St. Augustine of Canterbury School provides state-of-the-art resources for student, teacher and administrative use. Using various software programs and websites, students are taught essential computer skills such as keyboarding, word processing, spreadsheets, multimedia presentations, coding, and digital citizenship. Technology in each classroom provides an opportunity for students and teachers to utilize content-aligned digital resources to provide reinforcement and enrichment. Student progress is monitored by using projects which provide authentic assessment of skill and knowledge along a continuum. With ample technology resources including hardware, software and internet access, and a full-spectrum, integrated Technology curriculum, St. Augustine of Canterbury School continues to prepare its students with invaluable 21st century skills for their continuing education and, eventually, to be successful members of the local and global community.

## Connecting the Classroom to the World
